

Contract for Marketplace Website for AI Agents

This Contract is made and entered into this 11 day of March, 2024, by and between FindPro Global Pvt Ltd (hereinafter "Client"), and Shivam Mittal and Dhruv Bakshi (hereinafter "Developers").

1. Project Description

Developers agree to provide Client with services for the creation of a marketplace website for AI agents, including the following deliverables:

* **Marketplace:** A website that allows users to browse, purchase, and manage AI agents. The marketplace will include the following features:

- + User authentication and account management
- + AI agent listings with detailed descriptions, pricing, and specifications
- + Shopping cart and checkout functionality
- + Order history and management
- + Integration with payment gateway for secure payment processing

* **Landing Page:** Specialized AI landing page

- + Captivating Animated Background: Full-screen animation representing digital intelligence and AI networks, setting an engaging visual tone.
- + Parallax Scrolling Effects: As users scroll, they experience depth and discovery, unveiling the variety of AI agents available.
- + Interactive AI Agent Showcases: Hover and click interactions provide quick snapshots or detailed views of AI agents, encouraging exploration.
- + Engagement through Animation: Subtle animations hint at AI capabilities, making the exploration process intriguing and informative.

* **Payment Gateway:** Integration of a payment gateway for purchasing AI agents. The payment gateway will include the following features:

- + Secure payment processing
- + Support for multiple payment methods (credit card, PayPal, etc.)
- + Support for recurring payments (for subscription-based AI agents)

* **Admin Dashboard:** A dashboard for managing AI agents, users, and marketplace data. The admin dashboard will include the following features:

- + User management (viewing, editing, and deleting user accounts)
- + AI agent management (viewing, editing, and deleting AI agent listings)
- + Order management (viewing, editing, and deleting orders)
- + Analytics (viewing marketplace data)

* **Quality Assurance:** Testing and debugging of the marketplace website, including the following features:

- + Functional testing (verifying that all features work as intended)
- + Automation testing (automating user testing)

* **Customer Support:** A dashboard for users to register new complaints and raise tickets and admins to have the ability to cancel, raise or resolve this ticket. Customer support will also include an AI chatbot integration to answer basic user queries.

* **Mobile Responsive:** Optimization of the marketplace website for mobile devices. The mobile responsive design will include the following features:

- + Responsive layout (the website adapts to different screen sizes)
- + Touch-friendly navigation (the website is easy to use on a touchscreen)
- + Optimized performance (the website loads quickly on mobile devices)

* **Specialized AI Training:** Training, tutorials, and AI Knowledge Transfer to Aditya Aggarwal:

+ Scope of Training: The Developers agree to provide comprehensive training to the Client (Product Manager) on artificial intelligence (AI) principles, software development practices relevant to AI, and the operation and maintenance of the AI agent marketplace developed under this contract. This training aims to equip the Client with the necessary skills and knowledge to understand, operate, and further develop the AI agent marketplace independently.

+ Training Details:

- Duration and Schedule: The training will be done in 3 sessions per week for approximately 1.5 hrs each. The specific schedule will be determined based on the availability and convenience of both Parties.

- Format: Training will be provided through a combination of live virtual workshops, hands-on coding sessions, and recorded materials. The Developers will ensure the training is accessible to beginners in software and tailored to the Client's learning pace.

- Content: The training will cover areas including, but not limited to, basics of AI relevant to the AI agent marketplace, overview of the software technologies used, operation and administration of the marketplace,

- + Support and Consultation: Beyond the formal training sessions, the Developers will provide follow-up support, including consultation hours which will be billable at a rate of \$40/hr per developer, to address specific questions or challenges faced by the Client in operating or developing the marketplace.

+ Materials and Resources: The Developers will provide the Client with access to all training materials, code repositories, documentation, and other resources developed or used during the training sessions. These materials will be licensed to the Client for personal use and learning purposes related to the AI agent marketplace.

+ Success Criteria: The success of the training program will be evaluated based on the Client's ability to perform specific operations and development tasks independently, as agreed upon at the beginning of the training. Adjustments to the training program may be made based on periodic reviews to ensure the Client meets these criteria.

+ Amendment and Termination: This clause may be amended with the mutual consent of both Parties. Either Party may terminate the training component of this contract with written notice if substantial breaches of this clause occur, subject to remediation terms as outlined in the main contract.

* **Bespoke Solutions:** Developers agree to provide bespoke solutions for clients of FindPro Global Pvt Ltd who require custom AI agents tailored to their specialized needs. This service will include the following provisions:

- + Opportunity for Custom Development: Developers will have the opportunity to work directly with clients to understand their unique requirements and develop AI agents that meet these specifications.

- + Scope of Work: Each bespoke solution project will be scoped individually, with details on deliverables, timelines, and payment agreed upon in writing before the commencement of work. This may include, but is not limited to, custom AI functionalities, integration with existing systems, and any specific features requested by the client.

- + Pricing and Payment: The pricing for bespoke solutions will be determined based on the complexity and scope of the project. A separate contract or addendum to this contract will be executed to cover the specifics of pricing, payment schedule, and deliverables for each bespoke project.

- + Intellectual Property: Unless otherwise agreed upon in a bespoke project contract, all intellectual property rights in the custom AI agents developed for clients will be assigned to the Client. Developers may retain the right to use the underlying technologies and methodologies for other projects, subject to confidentiality obligations.

- + Confidentiality: Developers agree to maintain the confidentiality of all information related to bespoke projects, including client requirements, project details, and any proprietary information shared during the development process.

- + Collaboration and Support: Developers commit to a collaborative approach, working closely with clients to ensure that the bespoke AI agents meet or exceed expectations. This includes providing necessary support during the development phase and any agreed-upon post-delivery support to ensure successful implementation and operation of the custom AI agents.

* **Developer Dashboard:** Developer Dashboard will be scoped individually, with details on deliverables, timelines, and payment agreed upon in writing before the commencement of work. This may include, but is not limited to, integration with existing systems, and any specific features requested by the client.

* **Agent:**

- + Level 1 - Basic Chat Interface:

- + Description: A simple chatbot with a narrow focus, fine-tuned for a specific purpose.

- + Development Time: Approximately 1 week.

- + Level 2 - Multimodal Interaction Agent:

- + Description: Extends beyond text-based interactions, integrating multiple input/output types such as images, videos, and audio.
- + Development Time: Approximately 3 weeks.
- + Level 3 - Integrated Service Agent:
 - + Description: Builds on multi-modal interactions and integrates with external services like Gmail, Calendar, etc., creating a more scalable solution.
 - + Development Time: Approximately 6 weeks for a scalable solution.
- + Level 4 - Advanced Decision-Making Agent:
 - + Description: Addresses more complex use cases, potentially involving autonomous decision-making, learning, and adaptation.
 - + Development Time: Highly variable, depending on the exact use case and complexity.

The time estimates provided are rough approximations and can vary based on factors such as the size of the development team, the availability of pre built models, and the specific requirements of the use case. Level 4 represents a more open-ended category where the development time depends on the intricacy of the agent's functionalities and capabilities.

Given these estimates, the client will be given the opportunity to meet in a DISCOVERY CALL to decide and agree on agents to be completed during this 14 week process. The completion of at least level 3 agents and 1 level 2 agent is expected, but final decisions will be made in DISCOVERY CALL.

2. Tech Stack

The following tech stack will be used for the project:

- * **Front-end:** NextJS, TypeScript
- * **Back-end:** TypeScript, Node.js, Python
- * **Database:** PostgreSQL, Redis
- * **Payment Gateway:** Stripe
- * **Version Control:** Git

3. Payment

The total cost for the project will be 14000 (USD), payable as follows:

- Payment schedule
 - Milestone 1 (Week 1-2) - 2000 USD
 - Milestone 2 (Week 3-6) - 2000 USD
 - Milestone 3 (Week 7-8) - 3000 USD
 - Milestone 4 (Week 9-11) - 3000 USD

- Milestone 5 (Week 12) - 3000 USD
- Milestone 6 (Week 13-14) FINAL GO LIVE + DOCUMENT DELIVERY - 1000 USD

4. Timeline

The project will be completed in 14 (number of) weeks, with the following milestones:

Week 1-2: Landing Page

- * Design and implement landing page for investment/partnership launch

Week 3-6: Marketplace

- * Design and implement the user interface and user experience for the marketplace.
- * Test and debug the marketplace platform, ensuring that it is stable and secure.

Week 7-8: Payment Gateway

- * Develop and implement the payment processing logic, including handling transactions.
- * Test and debug the payment gateway integration, ensuring that it is secure and reliable.

Week 9-11: Admin Dashboard

- * Design and implement the admin dashboard, including user management, agent management, and reporting.
- * Test and debug the admin dashboard, ensuring that it is user-friendly and efficient.

Week 12: Customer Support

- * Develop and implement the customer support system, including ticketing, email, and chat bot.

Week 13-14: Mobile Responsive

- * Design and implement the mobile responsive layout, ensuring that the marketplace platform is accessible and usable on mobile devices.
- * Develop and implement the mobile-specific features, including touch gestures, offline mode, and push notifications.
- * Test and debug the mobile responsive design, ensuring that it is optimized for different mobile devices and platforms.

5. Intellectual Property

Developers hereby assign to Client all right, title, and interest in and to the deliverables, including all intellectual property rights.

6. Confidentiality

Developers agree to keep confidential all non-public information related to the project.

7. Entire Agreement

This Contract constitutes the entire agreement between the parties and supersedes all prior or contemporaneous agreements or representations, whether written or oral.
